Course program:

This course covers the details of using (BGP) routing with IPv6. The format of the course is mainly to explain theory but also the practice of using IPv6 in a routing environment, With the course each participant will receive the book "Running IPv6" as documentation to take home.

IPv6 part:

- IPv6 basics;
- Requesting IPv6 addresses from RIPE;
- Putting IPv6 information in the DNS (BIND/Linux);
- IPv6 routing: OSPFv3 and multiprotocol BGP (Linux/Cisco).
- Question round.
