4TH 'LATE SUMMER DRINK' OVERWHELMING SUCCESS!

During probably one of the most sunny days of 2011, the Scheveningen beach in Holland was crowded with hundreds of telecom colleagues, visiting the 4th edition of the "NL-ix Late Summer Drink". Building on earlier traditions, the event was organised in Beachclub "Culpepper" in Scheveningen, Holland, famous for its cosy environment and brilliant view on the North Sea.

Over 300 visitors joined this unique yearly networking event, meeting many people, while enjoying the live music, entertainers, fingerfood, drinks, and the famous 'Contact-game'.

Have a taste of the great atmosphere at this event via the video coverage of 'ISP TODAY': <http://www.isptoday.nl/nieuws/zonovergoten-late-summer-drink>
And note already: September 26, 2012, for Late Summer Drink number 5!

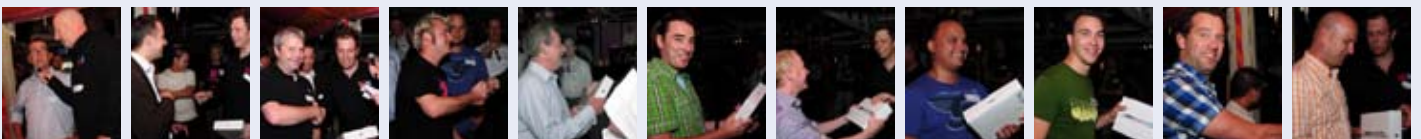

Enjoy many more photo's at: <http://www.nl-ix.net/drink/2011/index.html>

The winners of the 2011 'Contact-game' are: Carlos Levy (Expereo, left under) and Ralf Korschner (Arista Networks, right under).

DOUBLE DIGIT NUMBER OF WINNERS IN 'iPAD SALES ACTION'

As an exciting climax during the recent "NL-ix Late Summer Drink" not less than 12 winners were awarded with an 'iPad2' because of 'bringing a signed order to the event'. After the successful World-Championship 'iPad1' action last year, this 'iPad2' action was again very well received. Some winners even skipped their birthday party to rush to Scheveningen with an order and pick up their award. Provided that the 'iPad3' will come out next year, NL-ix may consider launching a similar action.

The winners of the 2011 'iPad Sales-action' are:

Surfnet, Oxillion, Fiberring, Ordina, I4IP, XL-IS, Leaseweb, SaasPlaza, Trans Networks, Uniserver, NTT, and Stepco

TWO NEW DATACENTERS UPCOMING

New agreements have been signed with two more datacenters/locations:

- *Telecity-5, Amsterdam*
(see special item)
- *KPN Waalhaven, Rotterdam*

Our complete list of operational datacenters can be found at www.nl-ix.net/datacenters

- that one of our earlier announced backbone upgrades and extensions (see Newsletter 13, July) has just been finalized: As of October 1, our RUG node in Groningen is at 10 Gb capacity! More info at <http://www.nl-ix.net/topology>

NL-ix AND TELECITY SIGN CONTRACT FOR 'TELECITY AMS-5'

During the recent NL-ix Late Summer Drink, TelecityGroup, a provider of premium carrier-neutral data centres, and NL-ix, signed a contract to expand NL-ix's capacity in TelecityGroup's existing data centres and to its new data centre, Telecity-AMS 5.

Obviously the Internet use has grown explosively in recent years and this trend is set to continue. Therefore, in response to growing demand for connections and capacity, TelecityGroup is currently building a new 9MW, 9000 m² data centre in Amsterdam Zuidoost. The contract allows both companies to meet the continued growth of the digital economy in the Netherlands.

NL-ix will be offering its services through AMS 5 from its opening. See for more datacenter updates: <http://www.nl-ix.net/datacenters>

Alexandra Schless, TelecityGroup's Managing Director, and Jan Hoogenboom, NL-ix's CEO, sign the contract for 'AMS5'
